## Where To Download Dissolution

Solvation or dissolution is a kinetic process and is quantified by its rate. Solubility quantifies the dynamic equilibrium state achieved when the rate of dissolution equals the rate of precipitation. The consideration of the units makes the distinction clearer. The typical unit for dissolution rate is mol/s.

### Solvation - Wikipedia

Dissolution is a living game, which means every action you take in the game will have real consequences. Something as simple as mining and selling ore will have a butterfly effect in the world: ore prices will decrease, factories would get cheaper to run, and eventually even the price of goods drop.
