Introduction to Instrumentation and Measurements

Introduction to Instrumentation (Archived) Course Description: This course is part of our eLearning Archive, which includes older courses that may not be current or as user-friendly as courses designed more recently. This course discusses how measurement is a key to life and explores where we use measurements.

Introduction to Instrumentation (Archived)

Instrumentation is a collective term for measuring instruments that are used for indicating, measuring and recording physical quantities. The term has its origins in the art and science of scientific instrument-making. Instrumentation can refer to devices as simple as direct-reading thermometers, or as complex as multi-sensor components of industrial control systems. Today, instruments can be found in laboratories, refineries, factories and vehicles, as well as in everyday household use
