Managing Information Systems By Laudon And
Tawney 2013 01 01 Hardcover

In business, management information systems (or information management systems) are tools used to support processes, operations, intelligence, and IT. MIS tools move data and manage information. They are the core of the information management discipline and are often considered the first systems of the information age.

The Role of Management Information Systems | Smartsheet

A management information system (MIS) is an information system used for decision-making, and for the coordination, control, analysis, and visualization of information in an organization. The study of the management information systems involves people, processes and technology in an organizational context. In a corporate setting, the ultimate goal of the use of a management information system is to increase the value and profits of the business.
