Apple's iBook G4 replaced the previous iBook G3 in October 2003 and was the last of Apple's computers to transition to the PowerPC G4 processor. The new model retained the white plastic shell from the old design, but replaced the tray-loading optical drive with a slot-loading version. The iBook G3 was updated twice in 2004 to increase the processor speed but kept the same model number (see ...

The iBook G4 models look similar to the previously released iBook "G3" models, but internally, the computers are very different. The iBook G4 systems use the faster PowerPC "G4" processor -- as one would expect given the name -- but also have a faster motherboard design with a faster system bus, support for faster RAM, faster hard drive support, and faster graphics capabilities.
