answers). b. At least 25 problems that sample the year's math curriculum. c. Each probe sheet should be different but equivalent in grade level/difficulty with the same number of problems representing each skill d. Items on probe sheets are randomly ordered but each sheet has the same random order. e. Single-skill probes are another option useful for short-term planning when students are ...

Math Curriculum Based Measurement - Vanderbilt University

At a minimum, the top 4 highest-scoring students from each chapter will advance to the State Competition (rather than the top team and top two kids not on the winning team). After advancing the top 4 highest-

scoring students, state coordinators may allow additional students to advance as long as the policy for progression is consistent for all chapters within the state.

Once every student has a worksheet, give them a countdown of 60 seconds to answer 20 questions. Then have students tally up their answers to see how they did. This exercise is just for fun, but adding an incentive — like crowning a class champion — can get students more interested in the activity. Try to do this activity a couple of times a ...
