This Equals That
This Equals That...takes viewers on a whimsical journey, while introducing them to the fundamentals of visual literacy and teaching them associative thinking –Aperture learning guide About the Author

This Equals That: Fulford, Jason, Shopsin, Tamara, Fulford ...
"This Equals That is printed like a children's board book, with rounded edges and durable pages to make it a durable, child-friendly object. But its lessons aren't limited to the young: how simple and powerful it is to recognize that a triangle and a shark are the same shape, that everything we can see is somehow connected to each other?"

Jason Fulford and Tamara Shopsin- This Equals That ...
"This Equals That," precisely because it so beautifully illustrates the philosophical conundrums of any such straightforward claim to equivalence, is an inspiring monument for all who seek to contemplate and extend the architecture of knowledge itself. Assuming external funding and necessary permissions can be secured, isn't it high time ...

This Equals That: Revisiting the Problem of "Equivalence ...
This Equals That By Jason Fulford, Tamara Shopsin. Aimed at children ages five and up, this clever and surprising picture book by artists and collaborators, Jason Fulford and Tamara Shopsin, takes young viewers on a whimsical journey while teaching them associative thinking and visual language, as well as colors, shapes and numbers.

If you want to do something specific when a cell equals this or that (i.e. is equal to X or Y, etc.) you can use the IF function in combination with the OR function to run a test, then take one action if the result is TRUE, and (optionally) do something else if the result of the test is FALSE. If color is red or green, mark with "x"

Excel formula: If cell is this OR that | Exceljet

If you want to do something specific when a cell equals a certain value, you can use the IF function to test the value, then do something if the result is TRUE, and (optionally) do something else if the result of the test is FALSE. If color is red, mark with "x" In the example shown, we simply want to "mark" or "flag" records where the color is ...

Main difference between .equals() method and == operator is that one is method and other is operator. We can use == operators for reference comparison (address comparison) and .equals() method for content comparison. In simple words, == checks if both objects point to the same memory location whereas .equals() evaluates to the comparison of ...
