RV Park Design | 50+ articles and images curated on ...

As the RV becomes more demanding of electricity, the RV Parks are upgrading to provide more sites with 50 amp service - instead of the standard for years - 30 amps! Between 2-3 roof A/C units, dryers, dishwashers (yes- dishwashers!) giant TV's, computers, etc. etc. - RV'ers are gobbling up electricity!

Site Style: RV sites are available in two styles: pull-thru and back-in. Although it all comes down to personal preference, Pull-Thru RV Sites usually make it easier to get your rig into the site straight. If backing your RV into a site makes you nervous, find an RV campground that has pull thrus. KOA offers both styles at many locations.

RV Campgrounds & RV Sites | RV Camping at KOA Campgrounds

How often we've seen sites which, while otherwise well designed, has an unnecessarily tall utility post that is right smack in the way of where a slider needs the space -- resulting in having to park the RV practically in the street at one end or the other of the site.

Characteristics of a Good RV Park

The load counted for a 20-ampere RV site receptacle is 2400 volt-amperes. And the load counted for each 20-amp supply provided at each dedicated tent site is 600 volt-amperes. The individual RV sites within an RV park are equipped with "supply-equipment" so that the RVs can connect to the available electric.

Sizing RV-Park Electrical Services Using NEC Table - Jade ...

I am currently looking at designing an RV parking layout with all the services including sanitary sewer cleanouts for each RV space. Does anyone know of any special design regarding the cleanouts? I am thinking of just adding 4" cleanouts using wye and bends over to a service line and then onto a sewer main.

RV Park Sewer Connections - Civil/Environmental ...

(b) Utility and telecommunication services shall be located below ground. (c) A winterized sewage disposal facility (dump station) shall be provided that is easily accessible and separated from the recreational vehicle stalls and amenity spaces. (d) Electrical services shall be provided in all recreational vehicle

Campground Design Standards

Design Utility

• Number of pullthrough sites with shade shelters. • Number of shade shelters. • Number of group-use areas. • Number of recreational vehicle (RV) sites with full utility hookups (e.g., water, power, sewer, etc.). • Number of day-use sites. • Location of playground, if any.

Recreation Facility Design Guidelines

Our RV doesn't have a washer/dryer, so it's important to have access to laundry facilities on-site, or at least a Laundromat close by. The place we're staying at now has a very small laundry room and only a few machines, which is great when I have a small load.

5. Road and Site Surface: While RV parks offer all types of road and site surfaces, the higher the grade of that surface the happier the camper. "Paved" interior roadways is one of the descriptors used by the much-used Trailer Life Directory. So too is the descriptor "grave" or "dirt", where those descriptions apply.

RV Park Survival Tips

Let's go through a scenario: You purchased your first RV, and you're eager to break it in on a nice cross-state adventure.You already know where you plan to go and you've read some reviews on a great nearby RV park. You go online to book a site, and you see some choices for types of sites.

Comparing RV Sites: Back In vs. Pull Through
