The review also found media decreases the likelihood of helping behavior. All of these effects were "modest," the researchers concluded. Overall, most of the research suggests media violence is a risk factor for aggression, but some experts in the field still question whether there's enough evidence to conclusively say there's a link.

### The Truth About Media Violence - Undark Magazine

The issue of media violence just doesn't go away. The debate raged when the Reagan administration deregulated children's television in the United States, and was revisited after the Montreal massacre on December 6, 1989. And the rash of high school shootings in North America and Europe at the end of the century has fuelled the debate anew.
