ARRL :: Operating :: Your First Amateur Radio HF Station

It is really handy to be able to leave this radio on your favorite 2m frequency while still having another radio available to operate HF. Compare this to the All Band Transceiver approach which can normally only receive one frequency at a time. A very popular HF radio these days is the ICOM IC-7300. Like many HF rigs, it covers the HF bands of 160m through 10m AND tosses in the 6m band, too.

Your First Amateur Radio HF Station GigaParts.com

At HF, those bigger antennas are more exposed to lightning and static, so build a sturdy entry panel that is bonded to a good ground system (see Grounding and Bonding for the Radio Amateur for a more complete discussion). When you build the entry panel for your antenna feed lines, make it bigger than you think you need.
